In Commando 2 our hero fought his way to victory in the harsh terrain of Asia. the purple threat of hacking. Unfortunately, the hero's work is never done - and so he was called upon once again to save the day. Use your s.. Crunchball 3000 is a futuristic and aggressive online game of ball for teenagers, which you can play in 1 1 or 2 player mode, where you control a team of players in the fastest and most popular sport in the world - Crunchball (a tough mix between handball, American football and ice hockey.) It's the end of the 29th century, and all sports have been banned - except Crunchball, high-octane, scoring a goal sport. Your goal is to score as many goals as possible by stopping the opponent from scoring. However, instead of kicking the ball to your teammates and into the goal, you should throw it. Crunchball is a very physical game, you have to charge into opponents to get the ball back - there are no fouls. You can play against a computer in career mode or against a friend in player 2 mode. This unique, fast-paced skill game really test your quick reactions. It will also exercise your strategic ability to plan and manage the game as you have to choose the different tactics and formations that your team uses. Ready to play a furious and futuristic sport that is about to take the world by storm? To put on a helmet, it's time to crunch! How to play: There are 3 different gameplay modes - Career Mode, Singles Match and 2 Player. In career mode, you have to take a team from the 4th division of the Crunchball League and try to get them to the top by playing matches against the computer. There are no leagues in one match mode, only a one-time match against a computer. In Player 2 mode, you play a match against a friend. Before you start playing, you have to set up your team. You can choose their name, kit color and preferred education. Each match lasts 90 seconds and the goal is to score more goals than your opponent by throwing the ball into the opposition goal. Manage players with a computer keyboard. Playing against a computer, use WASD keys to move players across the field. If you have possession of the ball, hit G to throw it in the direction you collided. Hit H pass it to a close colleague and J to change the formation. When the opposition has possession, hit G and H to tackle them and get the ball back. In Player 2 mode, the second player uses Arrows Keys to move their players, and numbers 1, 2 and 3 instead of G, H and J. In career mode, at the end of each match, you can use virtual income to purchase updates such as better equipment and training procedures. You can also bribe your opponents, but if you get caught - you lose the match. Tip: You don't have to throw the ball into the net to score a goal. You can just run into the goal with a player who has the ball to score (sort of like landing). If this flash game no longer works on IE11 on your computer/MAC, try playing on Chrome or Firefox. Your new post is loaded... Your new post is loaded... Scoop.it! Shop Empire Fable hacked - Best HACKED GAMES Open Store and start building a store empire.
